PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate specializing in data science and machine learning, with hands-on experience building end-to-end data analysis pipelines and predictive models. Passionate about turning messy, real-world datasets into clear, decision-ready insights, and eager to grow further in data analytics. Seeking data analyst/data scientist roles to apply strong Python, SQL, and statistical analysis skills to real-world problems.

EDUCATION

University of Sri Jayewardenepura	May 2023 - Present
Bachelor of Computing (Hons) in Computer Science- Faculty of Computing	
Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Data Analytics, Big Data Analytics, Statistical Distributions and Inferences, Machine Learning.	
Ramanathan Hindu Ladies' College, Colombo	2018 - 2020
G.C.E. Advanced Level (Physical Science Stream).	

PROJECT

Retail Price Trend & Inflation Analysis	2026
- Cleaned and analyzed ~22,000 weekly retail price records (2020–2024) across 8 product categories to study inflation dynamics through Sri Lanka's 2022 economic crisis. - Conducted formal hypothesis testing (Shapiro-Wilk, Mann-Whitney U, Kruskal-Wallis H, Dunn's post-hoc) to statistically confirm significant price shifts across categories and time periods. - Built an interactive Dash dashboard with cascading filters (year/month/category/item), KPI tracking, and a custom "Inflation Leaderboard" ranking items by percentage price increase. Technical Stack: Python, Pandas, SciPy, Dash, Plotly	
Github: github.com/Rushani-Sivakumar/Retail_Price_Trend_Analysis	
AI Job Salary Prediction Model	2025
- Built and compared salary-prediction pipelines (Linear Regression, Ridge, Random Forest) on 15,000 AI/ML job postings using one shared Scikit-learn preprocessing pipeline. - Selected the Random Forest as the best model with R^2 0.88 on held-out test data via 5-fold cross-validation. Technical Stack: Python, Scikit-learn, Pandas	
Github: github.com/Rushani-Sivakumar/AI_Job_Salary_Prediction	

TECHNICAL SKILLS

- Programming: Python (Pandas, NumPy), SQL, JavaScript
- Databases: MySQL
- Data Analysis: Data Cleaning, EDA, Statistical Analysis, Data Modeling
- Machine Learning: Scikit-learn, Supervised/Unsupervised Learning, Feature Engineering
- Visualization: Matplotlib, Seaborn, Plotly, Dash
- Tools: Git, GitHub, Jupyter Notebook, MS Excel, VS Code, Anaconda
- Cloud (basic exposure): AWS, Microsoft Azure, DigitalOcean

SOFT SKILLS

Leadership | Project Management | Collaboration | Communication

CERTIFICATIONS

- Data Science Professional Certificate - IBM (June 2026) | [Verify](#)
